INFORMATION

VISITORS ARE WELCOME

Come and visit with us and ask for any information. We have had twenty-five years experience with plants and soil conditions, and can possibly help you to grow better plants. If we can we will feel repaid for any time we may spend with you.

OUR LANDSCAPE SERVICE

We make plans for developing home grounds for our customers and give advise free of any charges. We would be glad to look your grounds over with you, and help you to beautify them—call us.

SPECIAL PRICES

While our retail price is the same to everybody, yet we sometimes make a special price on large orders. We also have some sizes of plants which are not listed. Write us or tell us your wants and let us figure with you.

GUARANTEE

We guarantee "Nursery Grown" plants only. When planted by us, and paid for within thirty days from time of planting—we do not guarantee lawns or the result from any seed we sow or plant.

SHIPPING

Let us write to you the best way to ship your order. As soon as we look your wants over, we can tell you the best way to have your plants delivered to you.

PLANTING SEASON

We advise everybody to plant in the fall of the year where it is possible to do so. There is no question but what it is better for the plants.

We plant at any time of the year when plants are not growing, and when the weather is not freezing.

We do not ship any of our stock from storage. All stock fresh dug and packing done at time of shipment.

PACKING CHARGES

Prices on our plants does not include boxing. We charge for that at cost.

BALLED AND BURLAPED

All plants that are classed as evergreens are balled and burlaped. That is the plants are dug with soil on the roots and burlap put around them. The price of each includes the above work.

PLANTS FROM OUR NATIVE GARDEN

We make a specialty of growing and selling shrubs, evergreens and trees that grow wild in our local mountains.

We have a section of our nursery which we call our "Native Garden" where we transplant and grow Rhododendron, Kalmias, Azaleas, Pink Locusts, etc. We are in position to take care of your wants in native shrubbery as collected from the woods. Also native shrubbery that has been transplanted and cultivated. Look our catalog over and let us know what you want.
